

VENTURE GLOBAL LNG

Project	Venture Global LNG, Inc.
Document Title	Document Numbering Procedure
Document Number	VG-000000-DMG-PCD-VGL-00001 <i>This document Supersedes CP-000000-DMG-PCD-VGL-00001 and PQ-000000-DMG-PCD-VGL-00001</i>
Document Type	PCD - Procedure
Owning Department	Information Management
Expiry Date	None

Security Classification & Disclosure

- ☐ **CONFIDENTIAL** – Information that is subject to confidentiality obligations, is of a high value or sensitivity, or should be shared with specific authorized persons only. See security classification matrix in Hexagon for list of authorized users
- ☐ **SSI Sensitive Security Information** ****ANY AND ALL DOCUMENTS REQUIRING AN SSI SECURITY CODE WILL BE CREATED ON TEMPLATE VG-000000-DMG-TEM-VGL-00012**** Information about security, operations, facilities, or other assets or capital projects whose disclosure would be detrimental to the security of transportation, transit employees or customers
- ☒ **COMPANY USE** - Information is to be secured from public access and is intended for use only by Venture Global LNG (VG) personnel; consultants or contractors that have a need to know and are subject to appropriate confidentiality obligations; and/or regulatory and governmental agencies
- ☐ **CEII Critical Energy Infrastructure Information**. Specific engineering, vulnerability, or detailed design information about proposed or existing critical energy infrastructure
- ☐ **PUBLIC** - Information that is publicly available or has been specifically approved for public release

Revision Modification Log

History: This document will be reviewed for effectiveness:

- ☐ Pipeline 49 CFR 192 Operational Manuals/Written Procedures: every year not to exceed 15 months
- ☒ LNG Facility 49 CFR 193 Operational Plans, Procedures, and Manuals: at an interval not exceeding 27 months, but at least once every 2 calendar years, or when a Component is changed significantly, or a new component is installed
- ☐ All other documentation: Every three (3) years and either issued as a new version or reaffirmed by the Document Owner.

The Valid date on the cover page of this Document represents the date by which the review must be completed. The following represents a summary of the changes made to this current revision of the document since the last revision.

Page No.	Section	Description
General	General	Minor grammatical edits and formatting cleanup
9	6.1	Updated Facility descriptions
9	6.1	Added two Facility Codes, C0 and P0, for Carbon Capture and Sequestration (CCS) support.
9	6.1	Removed note regarding use of "GEN" for general documents
10	6.2	New Area Codes (5) added for Carbon Capture and Sequestration (CCS) support.
11	6.3	Reformatted Unit Code table for readability and updateability
11	6.3	New Unit Codes (3) added, 35 – Evaporative Cooling System, 44 - LNG Expander Module and 67 - External Power Connection
11	6.3	Added seven new Units 55 to 61 for BOP Piperack
12	6.3	Removed Unit Codes 64 – CO2 Compression, 65 – Offshore Injection Platform, 89 – Pipeline CO2
12	6.3	New Unit Codes (5) added for Carbon Capture and Sequestration (CCS) support.

--	---	-----------------------

Page No.	Section	Description
13	6.4	New Sub-Unit codes allocated, modified and updated descriptions
13	6.5.1	Added Jetty 4
14	6.5.2	Updated to add Sub-Unit 90 to 94
15	6.5.7	Pipelines ID added for Unit 80 to 88 / Sub-Unit 00 and 60 to 69
15	6.5.8	CO2 General IDs added for Unit A0 and Sub-Unit 89
15	6.5.9	CO2 Capture IDs added for Unit A1 and Sub-Unit 89
15	6.5.10	CO2 Compression IDs added for Unit A2 and Sub-Unit 89
15	6.5.11	CO2 Transportation IDs added for Unit A3 and Sub-Unit 89
16	6.5.12	CO2 Sequestration IDs added for Unit A4 and Sub-Unit 89
16	6.6	New Disciplines added, CON – Concrete Engineering, DRL – Drilling Engineering, GST – Gas Supply & Transportation, LSA – LNG Sales, OMS – Ops Management Systems, PEX – Production Excellence, PSM – Process Safety Management, QMS – Quality Management System, RES – Reservoir Engineering
19	6.7.2	Non-Drawing type descriptions updated, NCR, NDE, and PHA
23	6.7.4	Updated Descriptions on C12, FC6, N16, W07 and W09 report types
24	6.8	Removed nine Originator Codes, BLM, EIA, EPA, FER, FWS, PHM, TCE, TET, and TGP
24	6.8	109 new Originator Codes added
24	6.8	Updated Originator Code Description for DNV and RCN
27	6.9	Corrected to “five-digit”
27	6.10	Corrected to “three-digit”
28	7.1	Updated document number examples for clarity and accuracy
28	7.1	Removed note regarding use of “GEN” for general documents
29	7.1.1	Corrected PID references to ISO, updated document number examples for clarity and accuracy
29	7.2	Updated document number examples for clarity and accuracy
30	7.3	Updated document number examples for clarity and accuracy
30	8	General edits

1 PURPOSE

Venture Global LNG, Inc. (VGLNG or Company) intends to manage its Company information consistently throughout project construction, ongoing operations and related business activities, to ensure controlled and efficient access to information. This information will be organized and managed so that all VGLNG personnel can readily contribute to an overall corporate knowledge base as well as be able to discover the information required to effectively perform their daily responsibilities in conducting Company business. A knowledge base or central repository will reside in a formalized Information Management System (IMS) using standard naming taxonomies and numbering schemas within an automated platform that will facilitate the proper dissemination, support and maintainability of information across the Company.

The purpose of the Document Numbering Procedure is to standardize the numbering, naming, coding and attributes assignments of all documents (e.g., Engineering Technical, Supplier, General (Project Management), and Correspondence) generated for all VGLNG projects by or on behalf of VGLNG. The attributes outlined herein are designed for use over the full lifecycle of the VGLNG facilities.

2 SCOPE

The numbering schemas defined in this procedure supersede any existing numbering standards that were previously published or defined for VGLNG.

All VGLNG employees and contractors shall reference this Procedure and ensure that numbering requirements as described herein are fully complied with during all phases of the project and subsequently through to operations. The numbering schemas and values presented in this document are deemed mandatory.

The consistent and appropriate assignment of document numbers to documents generated or acquired by VGLNG employees and contractors in the execution of their work is critical to the successful management of Information for the facility.

The information in this document will help realize the following objectives:

- Consistency in categorization, classification and labelling of information;
- Ensure information is easily identified as to relevance and context of use; and
- Discoverability in that information can be easily and efficiently searched and located in a targeted fashion.

4 DEFINITIONS & ABBREVIATIONS

The following is a list of abbreviations and definitions found in this document.

TERM	DESCRIPTION
A	Alphabetic character in numbering elements
N	Numeric character in numbering elements
“-“ (Hyphen)	Character used only for separating numbering elements
Attribute	Information element that describes a document or tag with further details
Company	Venture Global LNG, Inc.
Contractor	Third-party with whom the Company has entered into contract / agreement with for services or goods
Correspondence	Formal communication between two or more parties to provide instructions or clarification on pertinent issues; for example, a letter or memo between Company and Contractor. (Note: E-mail is not considered correspondence)
Database	A matrix of information in electronic format; databases generally consist of multiple tables of information including relationships between those tables
Document	A means to communicate a collection of related information which includes electronic files containing the equivalent of paper documents such as specifications or drawings, outputs from an electronic model such as the 3D design system, or report of database information
Element	A constituent part of the Document number
General Documents	Project Management Documents that communicate non-technical information regarding the status, administration, control and management of the Project
IM	Information Management
Originator	The Organization / Contractor / Supplier who initially created a document or a tag. Will not change on transfer of responsibility
Phase	A defined segment of a project, bound by time and scope, with specific deliverables and milestones.
Project	One or more facilities or installations operated by a subsidiary of Venture Global LNG, Inc.
Revision	A one to two-character code of Alpha, Numeric or Numeric-Alpha to track and define issue version of the document. Project-specific requirements for revision codes are defined in the Information Exchange Specification
Technical Documents	Formal information which includes text documents, databases, and drawings that communicate technical information defining the physical or functional requirements of the project
VGLNG	Venture Global LNG, Inc.

VENTURE GLOBAL LNG Document No.: VG-000000-DMG-PCD-VGL-00001	Document Numbering Procedure	Revision: 4
--	---	-----------------------

5 GENERAL REQUIREMENTS

VGLNG and Contractors shall assign a Company Document Number as defined in this procedure to all Documents which are generated or modified by or for Contractor in the execution of the Services, including those authored by Subcontractors and Suppliers/Vendors.

In addition, Contractor may apply its own document number (or that of its Subcontractors or Suppliers) in addition to Company's numbering on Company's Document Template.

5.1 Document Number Uniqueness

All documents shall be uniquely numbered. The document number will be utilized in communication with the project team.

5.2 Document Number Formats

The document number will contain alpha and numeric components. Special characters are not permitted. Leading and trailing spaces should not be used. A hyphen (-) is the only permissible special character in document numbers and file names.

5.3 Document Numbering Schemas

The required components of a document number may vary by document category. The schema for one document category may include components that do not appear in the schema for other document categories. However, the application of the Company's numbering schema will remain similar.

5.4 Sheet Numbers / Document Group ID

Sheet numbers (also known as multi-page identifiers) are only required when assigning document numbers for drawings. Sheet numbers are applied at the end of the document number and are prefixed with a hyphen.

Document Group IDs are only required when a grouped document, e.g., Databooks, Fabrication Record Books, etc. must be broken into separate records by either sections or volumes.

VGLNG Document Control maintains the approved list of codes which are acceptable values for the document number Elements. Prior to utilizing any code other than those listed herein, an employee or Contractor must submit a Deviation Request to Company Document Control via correspondence for approval. The request shall include an accurate description of the purpose of the code as well as a proposed value for the requested code. The Company shall reply to a Contractor's request within (10) working days via correspondence. The approved code will be added to the Document Numbering Procedure at a subsequent revision; however, Contractor may begin to use the approved code immediately.

NOTE: The sheet number is only required when applying a document number to drawings. Non-drawings, such as procedures, reports, plans, etc. that do not require being broken into separate records by volume or section do not need to carry the three-digit sheet number / document group ID element at all.

VENTURE GLOBAL LNG Document No.: VG-000000-DMG-PCD-VGL-00001	Document Numbering Procedure	Revision: 4
--	---	-----------------------

6 DOCUMENT NUMBERING ELEMENTS

Company Document numbers are composed of a series of Elements in a particular order and separated by a hyphen (-). The number for each Document is developed through the selection of a value for each Element from tables of permissible values based on the Document's content and origin.

For the purpose of assigning document numbers, there are three categories of Documents:

- A combination of Technical and General Documents
- Supplier Documents
- Correspondence

6.1 Facility Codes

A single Facility Code is assigned for inclusion in all document numbers generated for a project, across all contracts within the project.

FACILITY CODES	
Code	Description
VG	Venture Global LNG, Inc. (Corporate Office)
CP	Venture Global Calcasieu Pass, LLC
TP	TransCameron Pipeline, LLC
C2	Venture Global CP2 LNG, LLC
CX	Venture Global CP Express, LLC
PQ	Venture Global Plaquemines, LLC Plaquemines Expansion, LLC
GX	Venture Global Gator Express Pipeline, LLC
DL	Venture Global Delta, LLC
DX	Venture Global Delta Express, LLC
C0	Venture Global CCS Cameron, LLC.
P0	Venture Global CCS Plaquemines, LLC.

6.8 Originator / Recipient

The Originator code indicates the organization which is responsible (not necessarily the creator / developer) for the Document in the execution of the Services.

The recipient code indicates the receiving organization for an item of Correspondence.

VENTURE GLOBAL LNG Document No.: VG-000000-DMG-PCD-VGL-00001	Document Numbering Procedure	Revision: 4
--	---	-----------------------

6.9 Sequence

A five-digit numeric value which is used to ensure unique document numbers for each combination of other Elements. Each combination of Elements is allocated an entire series of sequence numbers, starting at 1 (meaning each combination of Elements may have for example a sequence number 00001). Contractor shall assign sequence numbers; however, may not assign meaning to ranges of sequence numbers (a block of numbers) unless specifically approved by Company.

6.10 Sheet Number / Document Group ID

Sheet number - a three-digit numeric value used to distinguish between separate sheets of the same Drawing number. Does not define the number of pages within a document.

Document group ID - a three-digit alpha-numeric code used to distinguish the volume/section number, for example -V01 for volume one, or -S01 for section 1.

VENTURE GLOBAL LNG Document No.: VG-000000-DMG-PCD-VGL-00001	Document Numbering Procedure	Revision: 4
--	---	-----------------------

7 DOCUMENT CATEGORIES

Schema Legend:

- **A** - Represents an alphabetic character. Alphabetic characters are comprised of the letters A-Z (ABCDEFGHIJKLMNOPQRSTUVWXYZ)
- **N** - Represents a numeric character. Numeric characters are comprised of the numbers 0-9 (0123456789) and can be listed in any combination
- **()** - Components in parentheses are optional
- **X** - Represents an alphanumeric character (may contain both A-Z and 0-9)

Special characters such as ~, /, \, @, &, %, _, !, etc., shall not be used in the document number.

7.1 Technical and General

Technical documents include but are not limited to engineering documentation (i.e., drawings, data sheets and calculations), and General documents (i.e., procedures and plans). Technical and General Document Numbers are based on a single structure as illustrated below:

Element	AA	N	NN	NN	X	AAA	XXX	AAA	NNNNN	(NNN)
Facility	<i>CP</i>									
Area		<i>1</i>								
Unit			<i>32</i>							
Sub-Unit				<i>02</i>						
Train/Tank/Jetty/Module/WBS ID					<i>A</i>					
Discipline						<i>PRO</i>				
Document Type							<i>PID</i>			
Originator								<i>VGL</i>		
Sequence Number									<i>00001</i>	
Sheet Number (only applicable to drawings)										<i>001</i>

Example:

PQ-11040A-PRO-PID-VGL-00001-001 (Sheet 1 of the first process P&ID generated by Venture Global LNG, Inc. for the LNG Storage Tank, Phase 1 North, on the Plaquemines LNG Project)

CP-13202A-PRO-CAL-VGL-00001 (First process calculation generated by Venture Global LNG, Inc. for the Diesel Storage & System Unit for Train A in Block 02 on the Calcasieu Pass Project)

VENTURE GLOBAL LNG	Document Numbering Procedure	Revision: 4
Document No.: VG-000000-DMG-PCD-VGL-00001		

7.1.1 Technical - Balance of the Plant (BOP) Isometrics

Document Numbers for BOP Isometric Drawings ONLY are based on a single structure as illustrated below:

Element	AA	N	NN	NN	X	AAA	XXX	AAA	NNNNN	NNN
Facility	CP									
Area		1								
Unit			32							
WBS Area				14						
Module					C					
Discipline						PRO				
Document Type							ISO			
Originator								VGL		
Sequence Number									00001	
Sheet Number										001

Example:

CP-13214C-PRO-ISO-VGL-00001-001 (First Isometric generated by Venture Global LNG, Inc. for the Diesel Storage & System, under WBS Area 14, Module C on the Calcasieu Pass Project)

7.2 Supplier

The following is the document numbering schema for documents submitted by a Supplier. Supplier documentation may be received against a Purchase Order or Contract.

Element	AA	N	NN	NN	X	AAA	XXX	XXXXX	NNNNN	(NNN)
Facility	CP									
Area		1								
Unit			00							
Sub-Unit				00						
Train/Tank/Jetty/Module/WBS ID					0					
Discipline						QAC				
Document Type							SDB			
Purchase Order No.								15793		
Sequence Number									00001	
Sheet Number (only applicable to drawings)										V01

VENTURE GLOBAL LNG Document No.: VG-000000-DMG-PCD-VGL-00001	Document Numbering Procedure	Revision: 4
--	---	-----------------------

Example:

PQ-11040A-QAC-SDB-15793-00001-V01 (Volume 1 of the first Supplier Databook generated by Supplier-issued Purchase Order 15793 for the LNG Storage Tank, Phase 1 North, on the Plaquemines LNG Project)

CP-13202A-PRO-CAL-15793-00001 (First process calculation written by Supplier-issued Purchase Order 15793 for the Diesel Storage & System Unit for Train A in Block 02 on the Calcasieu Pass Project)

7.3 Correspondence

Correspondence Document numbers are based on a single structure as illustrated below:

Element	AA	AAA	AAA	AAA	AAA	NNNNN	NN
Facility	<i>CP</i>	<i>DMG</i>	<i>VGL</i>	<i>WOR</i>	<i>TRN</i>	<i>00001</i>	<i>22</i>
Discipline							
Originator							
Recipient							
Document Type							
Sequence Number							
Year							

Example:

CP-DMG-VGL-WOR-TRN-00001-22 (First Document Management transmittal issued by Venture Global LNG, Inc. to Worley Parsons on the Calcasieu Pass Project, which was issued in 2022)

8 DOCUMENT NUMBERING ASSISTANCE

For questions on document numbering, please contact VGLNG Document Control at DocumentControl@venturegloballng.com
